This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, April 1, 1907.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, July 19, 1907.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

J. C. BILLHEIMER,
Auditor of State.

July 19, 1907.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

FRED L. GEMMER,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, July 19, 1907.

FRED A. SIMS,
Secretary of State.

Received the within report and delivered to the printer July 19, 1907.

HARRY SLOUGH,
Clerk Printing Bureau

TENTH ANNUAL REPORT

OF

DEPARTMENT OF INSPECTION.

Hon. J. Frank Hanly, Governor of Indiana:

Sir—I have the honor to submit herewith the tenth annual report of the Department of Inspection, for the year ending October 31, 1906.

I am pleased to place an exhibit in your hands not only of what has been accomplished by the enforcement of the various laws enacted for the protection of the lives, health and morals of those employed in the industrial establishments of the State, but of the general public at large who visit places of amusement, or are guests at hotels, or those who are assembled on the upper floors of many buildings.

The year just closed has been one of unprecedented activity in all industries of the State. The mechanic or laborer has not had to search for employment; the employment is searching for the workmen, with wages higher than at any previous period.

It is also gratifying to be able to state that with all the rush and overtime worked but one serious disaster has occurred, and in this but two persons of the many employed lost their lives. The report will show that from the creation of the department, deaths and serious injuries as the result of dangerous machinery have gradually decreased, excepting on shafting. Despite all our care, loose clothing and too much haste have prevented any reduction from this cause.

CHILD LABOR.

The subject of child labor is one that has attracted the attention of philanthropists and sociologists to an extent never before known. In their conferences, where the laws of the different States and their enforcement have been discussed, I do not recall an adverse criticism of either with reference to the State of Indiana.

Our present law, passed in 1897, and amended in 1899, with a few slight changes, would be equal to that recommended by the National Child Labor Committee, which is given as, and really is, a model. Our law permits the employment of minors between the ages of fourteen and sixteen years for sixty hours per week. Under the existing conditions, more particularly in the larger mercantile establishments, these hours are too long, especially on Saturdays and the weeks preceding the holidays, when they are on duty until 10 p. m. The ten-hour-per-day law is evaded by extending the noon and lunch hours so that while they have only been employed ten hours, it has been thirteen or fourteen hours from the time they first reported for duty. These long intervals for meals have a demoralizing effect upon the cash girls and boys who are on the streets away from all parental or other control the greater portion of the time.

The State of Illinois has reduced the hours of those between fourteen and sixteen to forty-eight per week. The National Child Labor Committee recommends the same hours. Would respectfully recommend such change in our law in the interest of health and morals for those under sixteen years of age.

Our present law does not prohibit night work of boys between fourteen and sixteen years of age, as does that of Ohio, Illinois and Minnesota. By referring to our report for 1905, I find there were employed in the glass industries of the State six hundred and thirty boys between the ages of fourteen and sixteen years. They are about the only ones who would be affected should any change be made. There is and has been a scarcity of this kind of help in the glass industries since the enactment of the law in 1897, notwithstanding that machinery has taken the place of hundreds of boys. One factory alone which reported two hundred and sixty boys under sixteen, in 1897, now reports but thirty-five, although they have more than doubled their output.

BAKESHOPS.

The Bakeshop or Sanitation Law has accomplished more in the way of cleanliness than its friends anticipated. Bakeshops, confectionery, canning and preserving establishments have all been subject to a rigid inspection. Orders to scrape, wash or paint all woodwork, lime wash sidewalls and ceilings and provide drains to sewers have been issued and complied with, thus improving the sanitary conditions.

It would greatly increase the efficiency of the Department should the number of deputies be increased so we might have the assistance of a practical baker.

BOILER INSPECTION.

The General Assembly of 1903 enacted a boiler inspection law. Owing to the many interests opposing such a measure concessions had to be made in order that a law of some kind might be had; that its provisions are limited in their usefulness is true; that there is a law of any kind on this subject is a great gain. Defective as it is, it has shown the importance of having all boilers regularly inspected by a thoroughly competent inspector.

On account of the lack of office help, we are unable to state the number of boilers that have been condemned, or how many dangerous defects have been ordered repaired. Boilers have been inspected and condemned that had never been inspected from the time they were installed and were found in a most dangerous condition. In some cases the owners admitted they were not safe, yet because there was no person with authority to condemn they continued to use the boilers, while their better judgment was that their use should have been discontinued.

The present law should be amended by requiring all insurance companies and inspectors doing business in the State to furnish this Department with a copy of all inspections made by them, and should they cancel or refuse a policy, because of dangerous defects, they should notify the Department without delay. The Department could then prohibit their use until they were placed in a safe condition.

It is too frequently the case that where certain changes are requested the parties in charge refuse to comply because they are not convinced that they are necessary, allowing the policy to be canceled and they taking the chances. Two destructive explosions have occurred recently. Had the Inspector's orders been complied with they would not have happened.

There are a number of boilers in use that insurance companies have refused to insure because of dangerous defects. Just recently, in a municipal plant, the insurance policies had been canceled by two companies, but were accepted by the third. On their next visit, however, they requested the reduction of the pressure to ninety pounds. This the assured refused to do. The policy was canceled and the higher and dangerous pressure continued. In

order that they might be within the meaning of the law, they secured the service of local inspectors who gave them permission to carry the higher pressure.

When this Department secured all the facts in the case the local inspection was ignored and the pressure reduced to what the insurance companies directed. The two most destructive explosions that occurred recently would not have happened had not those in charge thought they knew more about the boilers than the inspectors and refused to carry out their instructions.

There have been sixteen explosions of boilers in this State in the past year, causing six deaths and thirteen injuries. In the last seven years our reports show that there have been sventy-six explosions, causing forty-nine fatalities and one hundred and eight injuries. That most of these could have been prevented with proper inspection and competent men in charge is proved by the fact that Massachusetts, with more than twice as many people employed in her factories as Indiana, did not have a single explosion in nine years. It is the only State with such a record, and it can only be attributed to the care exercised by those who make the inspections and the Licensing Engineers' Law, which is strictly enforced.

The same results can be had in this State with similar laws, and without great cost to the State, as fees for inspections and licenses would about cover the expense.

BOAT INSPECTION.

Frequent complaints have been made by those who have had occasion to be on some of the boats on the lakes of the State. There are none of these lakes large enough to come under the care of the national laws, yet they are of such dimensions that unless some precautions are taken by the State a large number of lives will be lost. I am informed that boats are overloaded, safety valves weighted beyond a safe pressure, with no provision made to meet an emergency should one arise.

The present law only provides for the inspection of the boilers and machinery. The certificate of authority to operate such boat does not prevent the overloading of either the boat with passengers or the boilers with steam, either of which is a very dangerous practice. Even when not overloaded, provision should be made to meet any accident or emergency that might arise.

That this may be done, a new law and regulations should be had. The inspection of these boats would give better results were they inspected by a member of this Department, and respectfully recommend that such changes be made in the law.

NEW DANGERS.

Quite recently the daily press has given an account of panics in two theaters of our State, one in this city and one in Evansville. In both cases they were caused by a cinematograph or moving picture machine. Fortunately, there were no fatalities, although many were quite seriously injured. At Greenwood, a gas tank of a somewhat similar machine exploded, killing two persons and injuring a third. The explosion occurred just before the performance. Had it occurred later when the house was filled, the results would probably have been much more disastrous.

Some eastern States that have had more experience with these traveling machines have very stringent laws regulating their use. Respectfully recommend a similar law in this State.

NEEDS OF THE DEPARTMENT.

In order that the Department may be as effective as the people expect it should be in the enforcement of all the laws which are primarily for the protection of life, health and morals of not only those who are employed in industrial establishments, but of those who visit places of amusement or are guests at hotels, the force of deputies should be increased.

The mammoth plant under construction on the lake front, near Hammond, which will surpass any similar works of its kind, will require the attention of a deputy the greater part of his time, providing they are as reckless with the lives of their employes as are plants in and near Pittsburg, Pennsylvania. Our report for this year will show more than two hundred thousand workmen alone in the factories and shops of the State.

A comparison of the amount and character of the work performed by this Department with that of other States having Departments of Inspection will demonstrate that we are handicapped for want of sufficient force. The following list shows the number of deputies and salaries in each of the States named:

New York, thirty-eight deputy inspectors, $1,000 and expenses.

Massachusetts, twenty-eight deputy inspectors, $1,500 and expenses.

New Jersey, eleven deputy inspectors, $1,000 and expenses.

Pennsylvania, thirty-nine deputy inspectors, $1,200 and expenses.

Ohio, fifteen deputy inspectors, $1,000 and expenses.

Illinois, eighteen deputy inspectors, $1,000 and expenses.

Michigan, sixteen deputy inspectors, $1,000 and expenses.

Wisconsin, ten deputy inspectors, $1,000 and expenses.

Indiana, five deputy inspectors, $1,000 and expenses.

With this showing, I most respectfully recommend that the number of deputies be increased by three, and one clerk in the office.

INTERNATIONAL CONVENTION.

I had the privilege of attending the twentieth annual convention of the International Association of Factory Inspectors, held in Columbus, Ohio, June 19th to 21st. These assemblies are attended by the inspectors of the various States and provinces and are of great value to all who are interested in the welfare of those whom inspection laws are intended to benefit.

The meeting for 1907 will be held in Hartford, Conn. Would most respectfully request that at least three members of this Department be permitted to attend. The information received by them in visiting the large manufacturing plants and the interchanging of views and experiences will be of such a character that they and the State will be well repaid for the outlay.

WORK IN OFFICE.

There have been four thousand four hundred and twenty-eight inspections made, requiring the issuing of two thousand five hundred and forty-eight orders for the better guarding of dangerous machines, elevators, repairing of defective boilers, improved sanitary conditons, fire escapes on hotels and public buildings. We also have received and examined two thousand two hundred and eighty-nine certificates of boiler inspections; received and referred for further investigation or other dispositon, two thousand and eighty-seven accident reports; executed seven hundred and thirty-six affidavits, without charge; mailed to the manufacturers and others of the State two thousand reports of 1905, and not less than four thousand parcels containing laws and blanks as provided for in the law; compiled and have ready for the printer a report of two hundred and twenty pages. Our letter book shows we have answered eleven hundred and sixty-seven letters.

Most respectfully submitted,

D. H. McABEE,

Chief Inspector.

RECAPITULATION AND COMPARISON WITH LAST REPORT (1904-5).

	1905-6.	1904-5.
Number of inspections made during fiscal year.....	4,728	4,501
Number of lodge halls, hotels, theaters and public buildings	104	132
Number of manufacturing and mercantile establishments, quarries etc.....	4,624	4,369

EXHIBIT A.

Tabulated Statement of Inspections Made

BY THE

DEPARTMENT OF INSPECTION OF INDIANA.

1906.

The following is an explanation of figures in column marked "Orders Issued and Complied With:"

No. 1. Relates to guarding of machinery and belting.

No. 2. Relates to affidavits, registers, and the posting of laws, and names of those between the ages of fourteen and sixteen years.

No. 3. Relates to toilet, washrooms and resting seats.

No. 4. Relates to elevators, hoisting shafts and stairways.

No. 5. Relates to fire escapes, exits, alarms and the posting of notices, in sleeping rooms, how to reach fire escapes.

No. 6. Relates to air space, water and ventilation.

No. 7. Relates to bakeshop and sanitary regulations.

No. 8. Relates to inspection of boilers or anything pertaining thereto.

No. 9. Unclassified.

Figures in black-faced type indicate the orders that have been reported as having been complied with.

Notice.—November and December are months of 1905.

EXHIBIT C.

Detailed Statement of Accidents Reported

TO THE

DEPARTMENT OF INSPECTION

FOR

Year Ending September 30, 1906.

The following is an explanation of abbreviations used:

Extent of Injury: F.—Fatal; Se.—Serious; Sl.—Slight.

In order that the report may be more promptly issued, the accidents are reported from October 1, 1905, to October 1, 1906.

EXHIBIT C—INJURIES.

Number.	Date of Injury.	Name of City or Town and Persons Injured.	Age.	Married.	Cause of Injury.	Nature of Injury.	On Machinery.	Extent of Injury.	Time Lost in Days.	Wages Lost.	Wages Paid During Disability.	Benefits from Other Sources.	Burial or Medical Expenses.	By Whom Paid.	Dependent Persons.
	1906.	Aetna.													
1	Oct. 2	Grimmer, William	32	M.	Powder explosion	Burned and mangled	No	F.					$100 00	Company	1
2	Oct. 2	Nicholsen, L. V.	34	M.	Powder explosion	Burned and mangled	No	F.					100 00	Company	3
		Alexandria.													
828	June 29	Isgrig, Geo.	33	M.	Unguarded gears	Shoulder bruised	Yes	Se.	54		$32 00		35 00	Company	
1072	Sept. 18	Poling, Henry	45	M.	Electric crane	Side crushed	Yes	F.							1
554	Mar. 13	Sater, Roy	24	M.	Belt and pulley	Hand amputated	Yes	Se.	36		75 00		55 00	Company	1
3	Oct. 23	Tolle, James	25	M.	Paper dryer	Crushed	Yes	F.					160 00	Company	
		Anderson.													
503	Feb. 1	Alexander, Walter	19	S.	Dough brake	Hand crushed	Yes	Se.	36	$39 00			25 00		
734	Mar. 21	Amrick, Chas.	46	M.	Blow-off blew out	Head and arms scalded	No	Se.

EXHIBIT D.

Selections from the 2,548 Orders Issued

BY THE

DEPARTMENT OF INSPECTION.

Showing the lines along which the Department is working, as well as the many phases of knowledge necessary for the proper discharge of the duties.

These orders are revised, corrected and mailed by the Chief Inspector on blanks prepared for that purpose from the office, 91 State House, where all communications with reference to same should be addressed.

EXHIBIT D.

SELECTIONS FROM THE 2,548 ORDERS ISSUED BY THE DEPARTMENT OF INSPECTION.

February 26.—Inclose floor end of drive belt and pulley in rattler room, after completing other changes in said room now under way; adopt, as soon as possible, some practical means for the removal of unwholesome gases and smoke from your core room when air currents are unfavorable to natural draft.

February 26.—Place a substantial gear shield before the inmeshing side of gears on two large power punches on west side in boiler shop, and on one small punch press on east side in shop, as pointed out to Mr. Maley; posting State Factory Law in each building (foundry and boiler shop).

Note.—Three days after inspection, and before the changes recommended had been made, one of the shop workmen suffered loss of one leg in the gears above referred to.

March 9.—Provide and attach, to the east side, a shield or guard over the reciprocating parts and cable cam on dough divider machine; apply a permanent holder (one that can not be removed) on belt shifter to prevent the shifting of belt to tight pulley while machine is being cleaned; report all accidents to this Department; and post State Factory and Sanitation laws and notices in each work room of your bakery.

March 16.—Connect, at once, your exhaust fan and flues with raveling machines, and keep same in working order and in use for the purpose designed.

March 16.—Provide and attach a shield or guard over revolving paper cutter having saw-teeth edge, and operated by a woman; place a board or screen shield along south rail of each twisting reel as safeguard, on second floor in twisting room.

March 16.—Cover exposed drive shaft in women's sewing room; house in the bevel gear on west end of three Nordyke & Marmon bolting reels next to west wall, in mill B; inclose four bevel gears on new steamer, second floor, and house in two exposed conveyor gears in mill basement.

March 28.—Replace the present defective lifting cables of your elevator with new cables as soon as possible.

April 2.—Provide, at once, suitable water closets, properly screened and well ventilated, for the use of employes of each establishment, namely: The Monarch Governor & Machine Company, The Advance Machine & Sup-

ply Company, and The Crescent Soap Company; such water closets shall be arranged for the males and females, separately; the closets now in use are open, exposed, unsafe, unsanitary and are not separate as required by law.

April 6.—Provide ample and proper means of ventilation for the work rooms now used by you as sewing or machine rooms. Authorities agree that not less than thirty cubic feet per minute should be supplied for each workman in the room.

April 14.—Raise the heighth of your elevator safety gates so persons can not pass head over top bar, or attach "tell-tales" eighteen to twenty-four inches long on the front and under side of elevator platform; provide knotted ropes, one on each third and fourth floors to reach to the ground, for use in event of fire below third floor until such time as more persons are employed above, when a regular outside fire escape must be placed; post one copy of State Factory Law above each floor.

May 1.—Have your boiler inspected, internally, every six months, as required by law; keep certificates of such inspections on file and mail copies of the same to this Department.

This boiler must not be operated until the safety valve has been freed and actual condition of the boiler has been made known.

May 1.—Have the three exposed gear wheels on elevator motor mechanism inclosed under shield, on third floor; place some safeguard that will prevent a workman falling or stepping into floor opening between large tanks, on fourth floor, in effort to turn hot water valve; place some shield or hooding over two exposed motor operating gears, in bottling house, and post State Factory Law in each building.

June 8.—Provide an emergency trap exit in floor, in northeast corner of store room, not less than 24 inches square, made easily accessible from passageways in east basement, at north end, with a permanent ladder from trap exit to ground; said trap must not be covered above and arranged for easy opening from below; the iron sidewalk doors, at north end of west basement, must be so arranged that one person from below may open same; provide speaking tube through floor above as a means of alarm in event of fire in basement, and place a red light over platform in basement stairway directly in front of first floor entrance.

June 26.—Secure age certificate for errand boy and keep same on file in your office; employ no minors between the ages of fourteen and sixteen years without proper age certificate has been provided and placed in your possession; provide, at once, one separate water closet for use of female employes and drain pipe for waste water from second floor washing place to sewer; post state factory law in your press room.

July 15.—Make safe the rotten and dangerous window sills to which is anchored large window sash and plate 66x59 inches on second floor of building; on third floor of same building, make safe with new glass a like window with broken glass; both windows immediately over sidewalk, endangering the lives of passersby.

July 31.—Lime wash, at once, the interior of your bakeshop; thoroughly washing and cleaning the doors, windows and window casings; scraping and cleaning dough troughs, bread boxes and other furniture; screen shop windows and doors during fly season, as the law requires; post in your shop the state laws and notices mailed to you under separate cover.

A disregard of this order will be followed by prosecution.

March 22.—Have your boiler inspected every six months as required by law; provide dogs on the running boards of all rip saws, and insist on employes using the guards on all machines.

March 26.—Repair the gauge-cocks on boiler and keep them in good working order at all times; have boiler inspected, at once, and every six months in future: keep certificates of such inspections on file and mail copies of same to this Department.

March 30.—Have your boiler inspected, at once, and every six months in future; keep certificate of such inspection on file and mail copy of same to this Department; provide larger connection pipes to water column, and remove the globe valve from between the safety valve and boiler.

April 4.—Plumb all furnace stacks and columns under furnace stacks; provide iron rings around stacks for fastenings for guy rods; remove 9-inch brick lining from upper part of stack and replace with not more than 4½-inch, and keep lower part of stack properly lined.

May 9.—Cover all the lower half of beater belts or erect a guard rail along them; shield all low shafting, in mill; provide guard rails at the wheels of all gas engines; cover or countersink all set screws in collars and hubs of pulleys, and shield all gear wheels.

September 25.—Cover or countersink all set screws in collars and hubs of pulleys; house in or shield all low shafting, in basement, at crossings and exposed places; provide a one-inch pipe to water column with a good blow-off pipe from column; have your boiler inspected, at once, and every six months in future; keep certificate of such inspections on file and mail copies of same to this Department.

January 13.—Place hand rails on stairs leading to basement; cover point of contact of cog gears on dryer; cover shaft ends on degerminator; place closet in sanitary condition; have boiler inspected every six months as required by law; cover or countersink all projecting set screws in set collars and pulley hubs, and post new laws.

January 22.—Employ no females after 10 p. m., in future; provide means for removing offensive slops; cover shafting on second floor, on south side of building; place hand rails on stairs, and cover or countersink all projecting set screws in set collars and pulley hubs.

February 13.—Repair gauge cocks on boiler; cover or countersink all projecting set screws in set collars and pulley hubs, and on west end of reel No. 6; cover or cut off the projecting end of mandrel on east end of

same machine; provide shield in front of belts and pulleys on roll ends at runways; floor, to a reasonable width, the tops of grain pits where shafting appears on third floor of elevator.

February 16.—Place steps to all windows leading to fire escapes; supply all stairs leading to floors where female help is employed with solid risers from tread to tread; have boilers inspected internally every six months and keep reports of such inspections on file in office; repair gauge-cocks on boilers; provide ¾-inch connections to water column of small boiler; instruct employes that machine guards must be kept in use; post proper notices of young persons employed, and post enclosed noon permit.

April 30.—Cover exposed cog gears on punches, eye bender and bolt threader in machine and blacksmith shops; cover couplings and divided set collars on shafting in iron and wood shops; provide guards for rip saws in pattern shop and enlarge guard on jointer in planing mill; place shield around coping heads on tenoner, and hoods over emery wheels; cover or countersink all projecting set screws, and post additional laws.

January 30.—Provide rubber mat in front of switch board.

March 3.—Box or shield low shafting in engine room; cover or shield inmeshing gears on crusher; provide not less than ¾-inch pipe from boiler to water column on the firebox boiler; provide two more gauge-cocks for same boiler; repair and clean seats of water closet used by packing room employes.

June 1.—Provide legs for dough trough and castors for legs of same; lime wash or paint walls and ceiling of bakeshop, and post law and expectorating notices.

December 23.—Provide a clutch on rubber rolls that can be thrown out instantly in case of accident; provide larger collars on emery wheels, in machine shop; keep a register and roster of minors employed, and post laws.

Any information desired with reference to this clutch can be had from the Farrel Foundry & Machine Co., of Ansonia, Conn.

February 20.—Post in a conspicuous place in every sleeping room a notice descriptive of all means of escape; post notices in the halls and on doors leading to fire escapes.

May 8.—Comply with the recommendations made by the inspector of the Hartford Steam Boiler Inspection & Insurance Company.

May 10.—Have your boiler inspected every six months as required by law; keep certificates of such inspections on file and mail copies of same to this Department; provide three gauge-cocks for boiler; provide a shield over cut-off saw; cover lower pulley of band saw; repair table of trimming saw; erect a rail in front of vat where you steam wood before cutting, and post laws.

March 12.—Dear Sir: Your certificate of boiler inspection received. The grate surface is given as 13 square feet, safety valve as a pop of 1½

inches in diameter. You will increase the diameter of said valve to 2½ inches, as required by Section 1, Chapter 246, Law of 1903. "Pop valves shall be in the ratio of one square inch of area to three square fet of grate surface. A lever and ball safety valve in the ratio of one square inch of area to two square feet of grate surface."

Please report to this office when you have complied.

May 17.—Place fire escape on the northeast corner of your building in accordance with plans you now have, or place iron stair exit from third floor of your knitting factory, not less than 21 inches wide, and extend from third floor balcony to balcony on level with second floor, at northeast corner of building; the second floor balcony to extend over engine room roof, with steps from balcony to roof.

June 5.—Erect fire escape on your building, third floor balcony to take in south window on east end of building; balcony to take in one window at second floor, with drop ladder to ground.

June 5.—Erect a fire escape at the first window from the south end on the west side of building, at the third floor; balcony to take in third window from the north end on the west side of building, at second floor, with counterbalance stairs to ground, providing the north half of second floor is used for school purposes; if not, then place drop ladder from second floor balcony to ground; provide a door at the first window from the south end on the west side of building, opening out on to an iron balcony and extending over and on to two-story building, the door to be cut down on a level with third floor.

June 5.—Erect fire escapes as follows: Start at north window on east side of building, at third floor; balcony to take in second window from north end, at second floor, with drop ladder from second floor balcony to ground; place balcony on south side of building at west window of room No. 9, and take in east window of room No. 25.
